Protecting Our Students
CHILDREN ARE PRICELESS

- **Our Mobile Safety APP for Schools** measures your campus for strengths and deficiencies. A school shooting preparedness and awareness app.

- **POSSafetyNet℠** recognizes vulnerabilities missed and closes security gaps.

- **We provide your school with a "Tablet"** which has the Safety Application [POSSafetyNet℠] pre-installed.

Schools now assess the safety, security, accessibility, and emergency preparedness of school buildings and grounds - using the POSSafetyNet℠ site assess mobile app.

Reports generated so that your school gains the peace of mind of knowing that protocols and security measures align with best practices across the country.

No two schools are alike; The POSSafetyNet℠ gun safety policies take your specific school demographics into account:

- Primary or Secondary
- Geographic Location
- Building and Land size
- Student Enrollment
- Number of Teachers, School Staff, and Administrators
